

TheMagicTouch®

Direct-to-Film
The Ultimate Transfer Solution

Direct-to-Film (DTF) is a new innovative transfer technology that garment decorators and promotional product suppliers have been waiting for; eco water-based inks, no pre-treatment required, soft feel and durable. Suitable for cotton, polyester, performance fabrics, workwear, pique fabrics, canvas, leather, denim and lots more, all regardless of garment or item colour.

The DTF transfers offer strong vibrant colours. Excellent washing durability and stretchable properties. Lowest cost per full and single colour digital transfer print ever.

(UK Mainland Only)**

Adkins Inline Compact 600 Finishing Unit

The perfect option to control and manage volume curing of roll-to-roll DTF transfers. The compact design with integrated filtration operates from a standard domestic 13amp socket and features a unique dual heat process of five upper and five lower heating elements enabling transfers to cure better and quicker. The managed air and heat distribution across the transfer with reduced curing time and lower temperature enables lower cost.

- 60cm Max Media Width
- Space Saving Design
- Versatile Auto Feed Speed Detection
- Internal Filtration, Circulation & Extraction System
- Replaceable HEPA Filters
- Low Powder Warning Light
- Digital Touch Screen Display
- Dimensions - H 114 x W 98 x D 143cm
Weight - 275 Kgs
- Powered From Standard Domestic Plug Socket
(UK-13amp)
- One Year Warranty

**Includes delivery,

(UK Mainland Only)**

DTF Desktop Curing Oven

The perfect entry-level solution for curing low-volume DTF transfers quickly and easily. Compact design with built in carbon filtration.

Featuring a coil heating element ensuring even heat distribution across the entire surface, resulting in consistent transfer production.

Dimensions – H 25 x W 81.5 x D 59cm

Weight - 13.8 kg

Maximum transfer size - 40 x 50cm

Powered From Standard Domestic Plug Socket (UK-13amp)

One Year Warranty

Adkins Pro Cure Oven

The Adkins Pro desktop oven delivers consistent results when manually curing mid-volume DTF transfers. Featuring two reciprocating mesh trays (62 x 42cm) allowing users to cure in one tray and prepare the next transfer in the other. The compact design with integrated filtration operates from a standard domestic 13amp socket and features a unique dual heat process of five upper and five lower heating elements enabling transfers to cure better and quicker.

ADKINS

- Two 62 x 42cm Reciprocating Trays
- Each Tray Fits up to 62 x 42cm
